

Australia's petrochemical design, risk and safety specialists

Combining years of practical experience with the best in technical expertise, Moore Consulting & Engineering (MCE) delivers end-to-end services to the petrochemical industry across all areas of dangerous goods and fluid management systems.

When it comes to dealing with fuel, chemicals and risk you can rely on MCE to ensure that it is managed in an **efficient, safe and cost-effective** manner.

Learn how the National Approach affects your business

The National Dangerous Goods Framework commenced in 2001 and forms the basis of a uniform legislative framework for the storage and handling of dangerous goods in each State and Territory.

Implementation of the National Standard has now commenced with each Commonwealth, State and Territory agency moving to adopt the national standard. This standard marks the move from the prescriptive to a performance based structure, which provides the employer/occupier with the flexibility to develop a customised management system to meet the standard and at the same time to meet the needs of the individual workplace.

MCE can help you identify exactly how these rules may affect your business, ensure you comply with the laws to avoid fines, and help protect your business and people.

DANGEROUS GOODS CONSULTANTS

With dangerous goods, there are no second chances

When dealing with dangerous goods, navigating the applicable legislation, safety guidelines, standards and codes of practice can be a daunting task. Our team of highly qualified engineers has an in-depth knowledge of safe handling techniques, storage and system design.

We provide technical advice on all aspects and applications of state and national legislation. From trouble-shooting vapour and control systems to feasibility studies on chemical depots and trade waste systems, we cover safety from every angle.

MCE has carried out ongoing dangerous goods programs for companies such as Qantas, Mobil, Sydney University, Rail Infrastructure Corporation and many more.

When it comes to efficiently, safely and cost-effectively dealing with fuel, chemicals and risk you can rely on MCE.

SITE ASSESSMENT & AUDITING

Making sure your workplace is safe and compliant

If the storage and handling of dangerous and hazardous goods is not your core business, we can help ensure your business complies with the health and safety requirements. We can manage the full risk assessment process so you can focus on operating your business.

As dangerous goods experts with over 55 years combined experience, our team is up-to-date with all the current Occupational Health & Safety (OH&S) laws and your due diligence requirements under this legislation.

To determine whether your site meets all the legislative and insurance requirements under the OH&S regulations, we can conduct a detailed risk and site assessment. If you are planning a development that is potentially hazardous, we can also provide risk evaluation and assist with approval.

STATE REGULATIONS

We've got your WorkCover needs covered

MCE provides services relating to state based authorities, i.e. the government bodies responsible for managing each state's workplace safety, injury management and workers' compensation programs. Our engineers are recognised consultants in Occupational Health & Safety (OH&S), Dangerous goods and Hazardous goods.

MCE has been involved in the preparation of applications to store dangerous goods throughout NSW, Queensland and Victoria, for a wide range of organisations from industrial plants and logistics warehouses through to local councils and oil companies.

Proven experience servicing multiple industries

MCE has in-depth experience and expertise servicing a range of industries from aviation to warehousing.
